

What is Community Choice Energy?

Community Choice offers clean, local energy at competitive rates with the same reliable service. It can be administered by a local government, a non-profit agency or a coalition of local governments. This entity can purchase energy for customers on the open market, rather than just buying from one company.

Benefits of Community Choice:

- allows communities to buy clean energy & carry out energy saving programs
- creates local green jobs, such as installing solar and retrofitting buildings
- keeps energy dollars in the community and improves the local economy
- publicly accountable and responsive to community concerns
- gives regions control over their energy future

Climate Action Campaign has a simple mission: to stop climate change.
We aim to achieve 100% clean energy throughout the San Diego region.
