

City of Del Mar Climate Action Plan (CAP) Info Sheet

Above, 2005 Community GHG Emissions (includes Municipal Emissions) by Sector

Above, Del Mar's GHG emissions, Business as Usual Forecast, and Reduction Necessary to Meet Target.

	GHG Emissions (MT CO ₂ e)
2005 Baseline Emissions	48,776
2020 Business-as-Usual Forecast	57,285
No established Target	

Above, Del Mar's GHG emissions and Business as Usual Forecast

Recommended Targets and Goals*

Long –Term:

ICLEI (Local Governments for Sustainability)

recommends that the City's near term climate work should be guided by the long-term goal of reducing its emissions by 80-95% from the 2005 baseline level by the year 2050.

State Targets:

Executive Order S-B-05 adopts emissions targets for the State:

Reduce emissions to 2000 levels by 2010

Reduce emissions to 1990 levels by 2020

Reduce emissions to 80% below 1990 levels by 2050

AB-32 Scoping Plan provides guidance on establishing targets for local governments:

The plan suggests creating an emission reduction goal of 15% below "current" (2005) levels by 2020. Most local governments in CA that have adopted targets are aiming for 15-25% reductions under 2005 levels by 2020.

**San Diego Foundation 2005 Greenhouse Gas Emissions Inventory*

Status: Greenhouse gas emissions inventory completed in March 2011; currently working on CAP
